

Safety First

■ **Whatever space faring vehicles are built in the future they must be “SAFE”**

- Safe for Flight Crew and Passengers
- Safe for the Ground Crews, and Space Operations Crews
- Safe for the local and global population
- Safe for the Environment and Eco-system
- Safe for our children and future populations

■ **As a Goal : These future vehicles must be “AirLine Safe”**

■ **We believe that this will also lead to improved mission success**
